ABOUT ME

Front-end Developer with nearly 3 years of experience in building responsive, high-performance, and scalable web applications. Having worked as part of an internal development team, I've gained a solid understanding of various business processes and enterprise workflows. Proficient in ReactJS and modern UI libraries, with a user-focused approach to design and usability. Passionate about clean code, performance optimization, and continuous improvement. Currently expanding backend skills with Node.js and NestJS to grow into a well-rounded full-stack developer.

SKILLS

Frontend

- Proficient: ReactJS, NextJS, Redux, VueJS, TailwindCSS, Ant Design, Material UI, ShadCN UI, React Admin, HTML/CSS/LESS
- Familiar: VueJS

Backend (Basic)

- NestJS (basic knowledge), PostgreSQL, RESTful API integration

Tools & Platforms

- Version Control: Git, GitLab, Bitbucket.
- Low-code Platforms: AppSmith, JetAdmin.
- Others: Figma (for collaboration), Chrome DevTools, Postman

Development Practices:

- Responsive Web Design, Component-based Architecture, Agile/Scrum workflow

WORK EXPERIENCES

FRONT-END DEVELOPER

VIETMAP   11/2022 - Present

- Developed and maintained multiple ReactJS-based web applications for both internal systems and customer-facing platforms.
- Worked as part of an internal development team, which provided deep exposure to business workflows, cross-department processes, and real-world operational needs.
- Collaborated closely with UI/UX teams to design and implement responsive, accessible, and user-centric interfaces using Ant Design, Tailwind CSS, Material UI, ShadCN UI, and React Admin.
- Integrated RESTful APIs and managed complex application states using Redux Toolkit.
- Contributed to performance tuning, refactoring legacy components, and improving maintainability and scalability of existing systems.
- Participated in cross-functional planning, testing, and deployment to ensure each feature aligned with both user experience and internal business goals.

PROJECTS

CALL INSIGHT   3/2025 - Present

Description: A web-based call analysis system that supports the customer service team in evaluating employee performance and assisting staff in quickly accessing customer information for better support.
Technology:React Admin, Ant Design, Tailwind CSS, Firebase, Base backend (Node.js/NestJS).
Team: 6
Role: Front-end Developer, Base backend.
Detail:

- Worked as part of an internal team to build an end-to-end customer insight platform.
- Gathered and clarified requirements directly from stakeholders and converted them into structured implementation plans.
- Developed reusable UI components and CRUD dashboards using React Admin and Ant Design.
- Implemented responsive and accessible UI with Tailwind CSS.
- Integrated Firebase for real-time data sync and user authentication.
- Built and maintained backend base logic for certain data processing features.
- Participated in system testing and deployment, ensuring quality and usability.
- Supported end-users during rollout to ensure proper adoption and business alignment.

SALEPLAN APP   6/2024 - 12/2024

Description: The application assists VietMap sales team in creating sales plans for dealers based on product categories. Plans are structured quarterly and annually, enabling the assignment of clear sales targets for each salesperson. Managers can easily monitor progress and assess performance toward sales goals with transparency and efficiency.
Technology:React, Ant design, Redux moxb, Less.
Team: 6
Role: Front-end Developer
Detail:

- Collaborated in gathering and clarifying requirements directly from clients
- Analyzed customer needs and translated them into detailed implementation plans.
- Developed UI components and functional features according to the defined plan.
- Participated in **testing** and **deployment** to ensure product quality and stability.
- Provided user support during each project planning phase to ensure alignment with business needs.

WAREHOUSE APP   1/2024 - 5/2024

Description: A warehouse management application for VietMap warranty system, supporting inventory tracking, product returns, and warranty replacements. The app enables the creation of return/warranty import slips and allows checking product quantities across the entire VietMap warehouse network
Technology:React, Ant design, Redux moxb, Less.
Team: 6
Role: Front-end Developer
Detail:

- Collaborated in gathering and clarifying requirements directly from clients
- Analyzed customer needs and translated them into detailed implementation plans.
- Developed UI components and functional features according to the defined plan.
- Participated in **testing** and **deployment** to ensure product quality and stability.

INTERNAL APP   7/2023 - 1/2024

Description: An internal application system, including payment management, SIM management, and Logitech device management...
Technology: JetAdmin, Javascript, Css.
Team: 5
Role: Front-end Developer
Detail:

- Utilized the **JetAdmin low-code platform** to build internal web applications.
- Participated in planning and structuring internal project development.
- Designed user interfaces for multiple internal applications across departments.
- Assisted with **bug testing** and **deployment** to ensure stable project releases.

ADMIN E-COMMERCE   1/2023 - 6/2023

Description:The admin application for VietMap's sales system, enabling dealers to purchase products directly through the VietMap platform.
Technology: AppSmith, Javscript, Css
Team: 8
Role: Front-end Developer
Detail:

- Utilized low-code platforms to build and customize user interfaces efficiently.
- Configure and manage product information, promotions, and sales policies.
- Participated in project planning across multiple phases, from analysis to implementation.
- Managed front-end deployment processes to ensure smooth releases and updates.
